

RAYMOND RECORDER

No. 20

Vol. 6

April 27, 1956

The 3rd Ward Mia Mads and Senior Scouts held a Fireside Sunday evening after church on April 22 at the home of Mr. and Mrs. Cliff Williams.

Elder Rulon Fairbanks, recently returned missionary, showed films and told of his experiences in the Mission fields in South Africa.

A most attractive lunch was served by Myrna Williams and Janice Rudd.

The 3rd Ward Special Interest Groups recently enjoyed a social evening in the Second Ward Church when they honored their Bishopric in connection with their regular mutual meeting. A delightful program was presented with Harris Hall acting as M. C.

A most varied and sumptuous Smorgasboard luncheon was served.

Members of the Bishopric were each presented with a gift.

Annie Adams, Lois Hall and Dolores Scoville were responsible for a very successful party.

The Raymond Roping Club held a successful party in the Legion Hall on Saturday April 21st when about 20 members and their wives enjoyed a savory pot-luck lunch.

Pres. Cliff Williams, with the assistance of Alan Heggie Sec., took care of the business of the day. Later everyone participated in playing a variety of games under the direction of Mary Heggie.

A pleasant evening of visiting and eating was enjoyed on Sunday at the home of Mr. and Mrs. Ross Mendenhall when the Joe Keelers, Bill Nalders, Max Hamiltons and Gordon Andersons met and discussed a wide variety of topics while consuming great quantities of good food.

Chrysler Corporation To Resume Export Trade

Chrysler Corporation of Canada, Ltd. will shortly commence to ship automobile parts to five parts of the British Commonwealth, E. C. Row, pres. and general manager announced here today.

Mr. Row said that his company is currently working on orders to supply vehicles to New Zealand, Hong Kong, Jamaica, British Guiana and Singapore.

The cars will be Plymouths and Dodges, most of which will be equipped with right hand drive.

Shipments to New Zealand will consist of knocked-down components for assembly in that country. Completely Canadian built vehicles are being shipped to the other destinations.

"These shipments represent our first step in re-entering the export field since the war," Mr. Row said. "Except for a few shipments of components to New Zealand, this market has been cut off to us since 1939."

"Although the present volume of orders for export is relatively small when compared with our total production, we are hopeful that we can develop an export business to a greater extent in the future."

The total value to the company of the current orders is in the neighborhood of one and one half million dollars he said.

The special right hand drive cars are being built as part of the company's normal production program, Mr. Row added. The additional manpower required for this purpose raises the company's employment to a new all time "high". Close to 11,000 persons are now at work in the Windsor passenger car, engine and truck plants and administrative offices. Approx. 800 more are engaged in parts plant and sales activities outside the city.

Last week the company also announced that it was stepping up truck production schedules and that the truck plant will operate temporarily for one hour per day for four days of each week.

Red Cross Drive Far Short Of Quota

A total of \$50. has been collected so far in the Raymond and district campaign for funds according to returns listed at the Divisional Office in Calgary up to and including April 23. Quota for this area is \$1500.

The Provincial quota is \$503,200 of which the following has been collected: Calgary, \$213,910; Southern Branches, \$54,133.94; Edmonton, \$131,079; and the Northern Branches, \$24,138; other \$7324.13; totalling \$340,555.06.

It is expected that the full quota will be reached during the year for the books are kept open till Dec. 31. However, Branches are being urged to complete their quotas as quickly as possible in order not to infringe on other charities.

It is expected that once weather and road conditions have cleared, there will be many more returns being reported.

Gundlock Again Heads County Council

At a recent meeting of the Council of the County of Warner No. 5 D. R. Gundlock was again chosen Chairman of the Council for the ensuing year. O. G. Cronkhite was chosen Deputy Chairman for the next six months. Committees named were — School Committee, E. P. Pittman, H. M. Holmes, D. E. Holroyd, V. Slingsby. Public Works Committee, J. H. Barton, O. G. Cronkhite, H. R. Snow and Ronald Hult. Hospital Committee, D. E. Holroyd, D. R. Gundlock, and O. G. Cronkhite.

Kimball Anderson was appointed assessor, C. W. Boulton was appointed auditor, W. G. Jones was appointed constable, and J. P. Barton was appointed weed inspector.

The school budget was approved by the Council. This budget calls for an estimated expenditure for school purposes of \$631,300.00. This will require a basic mill rate of 29.5 mills which is the same as 1955.

Mrs. Edna Gilchrist is presently enjoying a visit from her daughter, Mrs. Arlene Black, and her daughter from Edmonton.

Returning from Calgary where they have been attending school the past year are, Joan Salmon, daughter of Bishop and Mrs. Robert Salmon, Jacqueline Thompson, daughter of Mr. and Mrs. George Thompson and Lavon Shaw, daughter of Mr. and Mrs. Frank Shaw.

Local Factory Tops In Safety Campaign

The Alberta Food Processors Safety Council, held a meeting on April 19 at the Palliser Hotel in Calgary, when delegates from Alberta Flour Mills, Canneries and Sugar Factories were represented, with 2 delegates from each factory and 2 members from the Compensation Board. Making a total of 30 delegates in all.

Joseph McLean and Clarence Bowden were delegates from the Raymond branch of the Canadian Sugar Factories. They report the Safety Council as an effective organization. Since in inception accident frequency has fallen to nearly half.

The Raymond Factory now holds the plaque presented by the Alberta Compensation Board for the lowest frequency of accidents annually. Meetings are held quarterly.

Mrs. Marshall Hervey, and two children joined her husband in Vancouver where he has been working, to make the return trip home with him.

While in Vancouver the Hervey's enjoyed a nice holiday, renewing a good number of old friendships with former Raymond residents.

On their return trip the C. P. R. was held up over night due to a mud slide. Other than that the Herveys report a very pleasant trip.

Motion pictures, colored slides, good food and good friendship were the main attractions at the Gordon Stone home on Wednesday evening when they entertained the Bill Nalders, Bob Brandleys, Ruth Walker, Max Hamiltons, and Joe Keelers.

Mrs. Lloyd Robideaux and small daughter, Tracy, of Las Vegas, are visiting with Helen's parents, Mr. and Mrs. Paul Redd and others of the family.

Jack McGillvray and his friends had a grand time on his 6th birthday when his mother entertained them at a party. An out-door peanut hunt and games inside made the children very happy. The delicious lunch with a candied birthday cake was served by Mrs. McGillvray.

An interesting Fireside was held after church at the Jim Terry home Sunday evening, April 22nd, when about 25 members met to hear an interesting lesson on the "Gathering of Israel" given very capably by Howard Hicken. The hostess served a delicious lunch.

Mr. and Mrs. D. McCrea of Blairmore and their daughter, Pat of Lethbridge and Mr. Davy Richardson of Blairmore, who worked in Raymond for the C. P. R. were Sunday dinner guests at the home of Mr. and Mrs. Albert Hague. Mrs. Emily Stewart, Mrs. Hagues mother is making her home in Raymond at present.

Mrs. Godfrey Holmes and Mrs. Myron Holmes were hostesses at the home of the former, for a calling shower for a recent bride, Mrs. Wilfred Werner, nee Mary Winkler, on Friday evening April 27th.

Many lovely and useful gifts were received by the bride who graciously thanked her friends.

The happy couple will make their home in Calgary.

Florence Nightengale Tea To Be Held May 11

Sponsored by Hospital Auxiliary — The Florence Nightengale Tea sponsored by the Raymond Hospital Auxiliary will be held in Friday, May 11th, from 3 to 7 p.m., at the Legion Hall. There will also be a bake table, grab boxes, sewing table, etc. Everyone welcome.

Colleen Housley, R.N., has had the honor of being the editor of the Nurses Year Book of the U. of A. for the past year. She will graduate at exercises to be held in Edmonton on May 14 and has no definite plans but may take another year's training at the University.

A very enjoyable time was spent at the home of Mr. and Mrs. C. D. Peterson on Sunday when their son Vern of Welling, and their daughters Mrs. Alex Poulsen of Magrath, Mrs. Howard Rabideau of Calgary and Mrs. Dean Gibb of Edmonton and their families and Mrs. Melvin Sabey of Nanaimo, B.C., were at home to visit their parents.

BYU Chorus Presents Entertaining Program

The Brigham Young University Chorus sang to an appreciative audience of about 300 on Friday evening April 20th at the Stake Recreation Centre. This fine group of students sang under the direction of Dr. Don L. Earl, who organized the chorus in 1946.

Three girls shared the honors as splendid piano accompanists.

The program lent interest to the listeners in its variety, which included numbers from the old masters as well as present day composers.

A number of Raymond families enjoyed entertaining members of the chorus as house guests. This group was sponsored by the Taylor Stake.

One of the nicest surprises happened at the home of Mr. and Mrs. Max Hamilton last Saturday evening when a group of their friends descended upon them bearing huge quantities of Chinese food of the finest quality. After a most pleasant evening of fun and pranks the Hamiltons were presented with the Joseph Fielding Smith book "Doctrines of Salvation" as a remembrance by the group.

High School Students Hear and See All About Petroleum

On April 16th, the Raymond High School students had the privilege of hearing John McCubbins, Assistant Manager of Public Relations, speak to them on the Canadian use of Petroleum. Mr. McCubbins demonstrated many of the countless by-products of petroleum.

From his "magic barrel" M. McCubbins took a thermos of diphenyl dichloro-methane, a refrigerant that continues boiling down to 22° below 0, and poured some into a beaker. Into the solution he dipped a delicate daffodile. The flower came out of the solution looking just as fresh as when it went in except for one catch, the flower was completely frozen! Since he had no further use for this liquid he decided to throw the rest away. Much to the astonishment of the students, the refrigerant evaporated almost before it reached the stage floor. The purpose of this experiment was to show the safety of the refrigerator.

From one of his thermos bottles, Mr. McCubbins poured some very hot dye. "Now," he said "we'll dip this piece of cloth into the dye, rinse it and see what happens." The result was amazing for out came a square of cloth striped red white and blue. He explained that because certain types of materials reacted differently to some types of dye, the Oil Company had discovered they could mix several dyes together, dip in a piece of silk a piece of cotton and a piece of rayon and each would come out a different shade. By careful examination the students found the square of cloth to be three types of material sewn together.

Another feature of Mr. McCubbins visit was the making of rubber. By a mixture of latex milk, vinegar and salt solution he obtained a bouncy wad of synthetic rubber which he bounced across the stage to show its elasticity.

Everyone listened intently to McCubbins lectures and after an interesting question period the students cordially thanked Mr. McCubbins for coming to speak to them.

Mrs. George Thomson was a recent Calgary visitor.

Raymond and district people were interested to see and hear Dreena Dahl and Judy Strong when they sang a duet on Monday evening over the Lethbridge TV station. The girls did very well and all enjoyed it.

Also over the TV station we saw Victor Lutz and his sister Gloria who were guests of C. J. L. H. for the day.

The Bible Study Group of the United Church has suspended its classes for the summer months. Dr. Scott has been called to Calgary for a special meeting held on Wednesday, April 25 Dr. Scott will work on a committee with Dr. Pidgeon, the ex-moderator of the United Church of Canada.

Mr. Godfrey Holmes of the Raymond Town Council was pleased to contact Mrs. Elsie McFarland of Lethbridge recently when she gave him information and explained the courses offered in the Recreation Leadership School at Red Deer. Every community in Alberta has the opportunity to nominate candidates to the school.

The Town Council hopes to create interest in this Recreation work which offers many attractive features and would like two boys and two girls to make application to attend this course to be held from July 9th to August 4 1956, in the Composite High School, Red Deer, Alberta.

Mr. and Mrs. Roy Woolley entertained a number of friends Sunday, after church April 22nd at a friendly informal evening. At the close, the hostess served an appetizing lunch.

Pres. E. J. Wood Called By Death

The death of President Edward J. Wood of Cardston on Tuesday, will bring sorrow to his many friends in the Raymond district. Pres. Wood has been a kind and benevolent man with many endearing qualities which has brought the love and respect of all who knew him.

Word has been received by her parents, Mr. and Mrs. Joe Strong, that their daughter Pat, who is attending the B. Y. U., is running for 1st Vice President in the coming elections at the University.

Miss Pat is also taking a leading part in the Junior Prom Assembly.

The Stake Y. L. M. I. A. held their monthly meeting at the home of Dorothy Dahl on Monday afternoon, April 23rd with a good attendance present. After the business was taken care of and the lesson discussed, Mrs. Dahl served an attractive lunch.

The Mutuals of the four Raymond Wards are combining to present a Fashion Show on Tuesday evening May 1st to be held in the 2nd Ward Church.

Local Talent Scores High In Music Festival

In the Spring Festival which was held in Lethbridge last week there was a total of 565 participants from the Raymond Schools with this number divided into 56 groups or classes. These classes won 21 first places and 19 seconds.

In the vocal solo section 9 first places were topped as well as 9 seconds while the trio entry came first. In the choruses led by Mrs. Redd 4 firsts and 2 seconds were won.

In Miss Smiths choral speaking the group won 1 first and 2 seconds while the Rhythm Band, grades 1-4 came first as did the action song of grade 2.

In comparison with last year's work there was slightly higher number of participants when they won 2 more firsts and one more second.

Mrs. Velma Redd was the instructor for the Public School classes from grade 5 and up as well as for the High School students, while Miss Smith had charge of the grades 1 to 4. Both teachers drew praise for their fine work from the adjudicators while the teachers felt it was a profitable and worthwhile work where the students gained valuable experience through the efforts put forth.

The Raymond Music Club, the only entrant from Raymond outside the School classes, came first in their group of Ladies Choruses, winning over the Tri Belles of Magrath.

The Club felt they had good criticism from the adjudicator who said they kept tempo and had particularly good enunciation of vowels.

Mrs. Eleanor Hudson was the leader of the group with Emma Dahl assisting at the piano.

Special thanks are offered to those who took cars and to the bus drivers.

The Busy Bees met on Wednesday April 18th at the home of Lucy Stevens for a sociable evening when the members made a quilt. Mrs. Emma Webster of Lethbridge was a special guest. Mrs. Stevens and Mrs. Herta Gehmleach as co-hostesses served a delicious lunch.

Mr. and Mrs. John Pickett and Mrs. George Pickett of Portland Ore., were in Raymond recently visiting at the home of Mr. and Mrs. Curt West and other relatives. The two Mrs. Picketts are the former Melba and Lavon West.

Returning with them were two other sisters, Donna Ericson of Stirling and Janice Shaw of Taber, who had been visiting in Portland.

Mrs. D. J. Purcell and Mrs. Mirza Pack, members of the Lethbridge Branch of the Handicraft Guild, made up a group of ten ladies from Raymond who attended an exhibit in the Red Cross Rooms in Lethbridge, of crafts, which included Ceramics, copper-ware, wood-work, leather craft, rug work and weaving, petit point and needle point. Exhibits in all these classes were reported as showing wonderful skill and workmanship and a great deal of artistic individuality. Some of this work was sold and will be highly prized by the owners.

Classes of the Handicraft Guild are held weekly and anyone interested in this work can become a member.

University of Alberta students home for the holidays include Max Holt, Murray Pack, Alan Tollesst, Charles Sommerfeldt, Jack Holt, Randall Meeks and Ron Spackman.

Mr. and Mrs. Bill Bowden were recent business visitors to Calgary, preparatory to leaving Raymond for Picture Butte, where the Bowdens will make their home.

Seminary Choir Sings At Church Services

Jim Hudson of Hill Spring, and his Seminary Choir consisting of 60 voices chosen from the students from Hillspring, Glenwood and Hartley, recently provided special music numbers for the Sunday night Services in the Raymond 4th and 1st Wards. The blending of these young voices was beautiful in rendering the songs, "The Lord's Prayer", "I Walked Today Where Jesus Walked" and "King Of Glory."

This group of singers, under the leadership of Mr. Hudson, have been invited by the Alberta Stake Presidency to provide music for the coming Alberta Stake Conference.

Mr. Hudson, son of Mr. and Mrs. Arlie Hudson, grew up and received his education in Raymond.

The Friday Nite Club met at the home of Mrs. Edna Gilchrist, April 20th. Since this was the annual Spring party supper was served. After the delicious repast, the group spent a most enjoyable evening playing Rook.

Mr. and Mrs. Mike Hofer and family are leaving Raymond to make their home in Warner, after living here for a number of years, where Mike worked at the Meek's Ranch. Mr. and Mrs. Hofer have accepted employment with the Warner County.

Virginia King entertained a number of friends on her 12th birthday, April 18th when they enjoyed the Spring weather by having a weiner roast.

School Band To Play At Lethbridge Band Festival

The Raymond School Band, under the leadership of Rex Nelson, will participate in the 3rd annual Canadian Legion Band Festival to be held in Lethbridge May 26th.

A Queen contest will be featured with Anne Gasler, the Raymond candidate.

The Amnity Club of Raymond dressed two dolls, a boy and a girl in colorful costumes of Turkish Moslems. These beautiful 30 inch dolls will be on display in the Raymond Merc. and tickets sold on the dolls will be good for one vote for our Raymond Queen.

Stirling News Notes

Friends will be sorry to know that Mrs. Clifford Hirsche and Mrs. Alfred Zaugg are patients in the Lethbridge Municipal Hospital.

Shots of the Salk vaccine for polio were given to the grade 4 school children and expectant mothers. Shots for small pox were also given to anyone who desired them.

In the entries from Stirling at the Spring Festival, held in Lethbridge last week, all contestants won a place. Helen Michelson won second in her class for vocal solo; Wilma Hogenesen won three seconds for piano.

Janet Clark who came first in her group for piano, was also fortunate in capturing the Ellison Milling Co. Scholarship offered for that division. Janet was heard in the final program on Friday evening of the Festival Winners.

"The Merchant of Venice", one of Shakespeares popular dramas, was presented by the Magrath Drama Club to an audience of drama lovers in Stirling.

Students of the Stirling High School recently enjoyed a successful wiener roast and dance.

Elodia Christensen is in Red Deer, attending the finals in the Alberta Drama Plays.

The Stirling Lion's Club held their regular meeting on Monday evening April 23rd when films of the Lion's International Convention were shown.

So Long --- We'll See You

The task of parting with people, things and places we have grown to love, is one of the hardest things we have to do.

So it is with the Hamilton family at this time. During the past six years that we have spent in Raymond, we have truly learned to cherish our membership in the Community and the people who make up one of the finest places in which to live to be found. But personal desire sometimes has to be tempered by economic factors.

After a thorough search of the possibilities of publishing a newspaper in the Town of Bow Island, we came to the conclusion that there was a much brighter future for our business there and so as soon as weather permits we will be leaving Raymond to make our home there.

An attempt to sell our shop here was made but no results came of it so we will be moving our equipment as well as our home. It is our plan to publish the Raymond Recorder on a semi-monthly basis until such time as another paper comes to Town and as long as the subscribers and advertisers want it. Mrs. Opal Wiggill will continue to represent the Recorder here for both gathering the news and collecting past-due and current subscriptions. According to our proposed plans we will be coming back at least once a month to pick up ads and job printing.

We are leaving Raymond with no ill-feelings toward anyone and not because our business here has been a failure — we are simply leaving because we feel that we would be doing ourselves and our family an injustice if we did not take advantage of this opportunity.

It is with sincerity and gratitude that we express our appreciation to the people and organizations we have been associated with for their friendship and support in the past, and say that anything we can do in the future to assist in things for the betterment of Raymond and district will be done.

Goodbye sounds so final that we will end our residence here and this message by just saying — So long, we'll see you.

Contributions to the Canadian Cancer Campaign help control cancer in three ways. They support research into the fundamental cause of cancer, provide the means for a lay education program and supply the money and materials needed by the Cancer Society volunteers offering assistance to the cancer patients.

It's Money Well Spent

Many corporation executives have felt that they had no right to give their shareholders money to cultural activities. Such an attitude does not make sense, declares The Financial Post, which adds: If Canada is to afford its citizens the opportunity for a rich and full life it must offer them more than a chance to earn a living, to live in physical comfort, to eat well and to drive on paved highways. It must provide for its people the experience of beauty and inspiration. It must give them vivid values to satisfy their intellectual curiosity. No one would suggest that our people should always have to go to the 'Met' to hear opera; to the Louvre to see great paintings; to Italy to see fine sculpture; to Stratford-on-Avon to see Shakespeare; or to Salzburg to hear the best fiddles playing.

Corporate money given to artistic and cultural enterprises can—put it in dollar terms—help create a climate in which business itself can flourish. It does it by making Canada a more interesting place for workers and management to live; by attracting the best immigrants; by giving our artists a chance to practice at home, rather than abroad; by raising the standards of our civilization.

Since it went into production in June, 1950, General Motors Diesel Ltd. has built locomotives for 17 Canadian customers as well as for six foreign countries — Brazil, Liberia, Pakistan, Norway, Ceylon and New Zealand.

AFTER OUR GRADUATES

Concern is spreading throughout many of Canada's university employment offices that U. S. companies might siphon off a substantial proportion of next year's already-short graduate crop, says The Financial Post.

"We're going to be robbed blind," says one placement expert, "if the existing U. S. political trend continues to the extent that draft legislation is repealed or even eased."

Presidential election tactics are being watched warily here in an attempt to foresee whether the Republicans will cut back draft requirements. Several university placement directors think the signs point to such a political move and they know the minute it happens U. S. recruiters will invade Canada in force.

Already short supply, engineers, chemists, physicists, and mathematicians are in equally short supply in the U. S. and employment economics are such, says one placement director that a Canadian company wouldn't have much of a chance competing.

W. H. "BERT" CADE

It is with pleasure that we announce that
BERT CADE
 has been appointed manager of our
 Raymond Branch.

Mr. Cade is well qualified to assume this responsibility, having had many years of experience in the gas and appliance business, and it will be his pleasure to be of service to you in any way.

We cordially invite you to stop in and become acquainted with Bert and the rest of the staff at our office, just east of Fritz's Farm Supply in Raymond.

Four different gauged locomotive trucks have been built by GM Diesel Ltd., London, Ontario to meet track-gauge requirements of its customers. These include standard gauge of 56 1/2 inches, broad gauge of 66 inches, narrow gauge of 42 inches, and meter gauge of 39.37 inches.

Ken Restal has accepted a position as Councillor in the 3rd Ward Sunday School who with Bruce Heggie and Eldon Brown, make up the Superintendancy.

Rainfall variability is one of the most important weather factors affecting farm production on the Prairies. Many old timers will recall two or three disastrous drought periods during their life time. One of the worst was in the thirties. Not only was the rainfall low, but it was low for several consecutive years. The severity of this drought varied from one Prairie area to another but to indicate how dry it was, the summer rainfall at Scott in Saskatchewan was below normal from 1935 to the end of 1940. The driest year was 1936 when the total rainfall for the April-August period was just under five inches, 3.5 inches below normal. In a region where normal rainfall is inadequate, this dry condition, lasting for such a lengthy period, was disastrous.

In sharp contrast to the drought of the thirties, the past 5 years have been characterized by wet weather. Mr. Geo. W. Robertson, Department of Transport meteorologist working for the Division of Field Husbandry, Canada Department of Agriculture, recently made a study of rainfall at 20 representative stations in the main farming areas of the Prairie Provinces. The study reveals that the average rainfall for the months of April to August averaged 2.2 inches or 23% above normal. This high rainfall appears to be spread over the whole crop season. During April, May and June the 5 year average for the 20 stations exceeded the normal by 1.2 inches or 23%, while for July and August the average exceeded the normal by 1 inch or 24%.

The wettest crop season was 1954 when the average rainfall for the whole area was 13.5 inches, 4 inches above normal. This increase was divided equally over the 1st and last parts of the season. Many points in the southern districts received from 4 to 7 inches more than normal during that season, and at least one point Broadview, Saskatchewan, received 20 inches which is a little more than double the normal. Northern areas were not quite so wet but seasonal averages ranged from 1 to 3 inches above normal. Only a small section of the extreme southwestern part of Alberta had slightly below normal rainfall in 1954.

Wet weather has implications other than higher yields. In a few areas where land is flat, flooding is a problem which either delays spring seeding or results in the removal of land from production altogether. Wet summer weather is often cool resulting in delayed harvests with the risk of fall frost damage. Cool weather is also favorable for the incubation and spread of certain diseases such as rusts and smuts. The resulting low grades for wheat may be aggravated by a lowering of protein content, also a result of cool, wet weather. Good land management involving protection against the wind and water erosion, moisture conservation techniques, weed and insect control, and soil fertilization, differs in wet periods from that practised in dry.

Some 12,000 gallons was needed to paint the interior of the new Canadian Pacific flagship Empress of Britain.

Latest Census figures show Canada has some 3,953 Scout Groups, an increase of 258 in the past year. Affiliations and 1955 totals (with 1954 figures in parenthesis) follow:

THE BROADWAY STORE

Alberta's Natural Gas Industry:

THE "GATE STATION"

After its long journey from the field to a population center, natural gas must pass one more inspection point — the City or Town "Gate Station." Here gas from one or many production fields is measured, checked and controlled for quality. Temperatures are checked and pressures regulated. Here, too, the gas dispatcher watches over his pipeline system. From the City or Town "Gate Station" flows natural gas of uniform quality — in the right amounts, at the right pressure, to meet the needs of every area receiving natural gas service.

With GAS you get service
 --we plan it that way!

June Fawns' class of Jr. Gleaners of the 3rd Ward held a Comradery at her home with the mothers and Ida Kenny as special guests.

The beautiful story of Ruth was told and the girls sang two songs, "I Have a Testimony" and "Sing Out Glad Heart".

June Fawns gave a short talk and Ella Hancock replied. Roberta Ericson's piano solo was greatly enjoyed. The girls served a delightful lunch.

A recent survey conducted by an independent organization for Canadian Cancer Society shows that although 30% of the women of Canada hold the erroneous opinion that cancer is never cured, more and more women are becoming aware of the symptoms of the disease and realize the importance of early diagnosis and treatment.

The cobalt bomb which was developed by the Canadian scientists is proving to be a most useful tool in the radiation treatment of small deep-seated cancers, officials of the Canadian Cancer Society announce. The Society provides money for further experimentation with the cobalt unit and for training of radiologists to use it.

In her lifetime, the average homemaker will wash two and one half million cooking and eating utensils, about 70 stacks as high as the Empire State building in New York, according to Frigidaire home research experts.

Of every 1,000 persons employed in Canadian industry, 225 were women in 1954.

Buick's 1956 Special is powered by one of the biggest engines of any car in its class. The high compression V-8 engine has 322 cubic inch displacement, the same size as the engine in the Roadmaster, Super and Century series. It develops 220 horsepower in the Special and 255 horsepower in the other three series.

True to their sure instinct for making wildlife news the whooping cranes have included National Wildlife Week in their annual migration to the Canadian North.

Eight birds are reported to have left the Aransas Wildlife Refuge in Texas for the long flight to Wood Buffalo National Park where their nesting grounds were discovered last year. The remaining flock of 19 may follow any day. If migration runs true to previous years it should be complete in about two weeks.

According to a report received by the Canadian Wildlife Service from the Texas Refuge, this year's population of whoopers raises two questions. What has become of the crane that disappeared during the bird's winter stay in the South? And what is the story behind the secrets of 3 strange whoopers reportedly seen on March 16th near Lexington, Ky.? Neither the Canadian Wildlife Service nor the U. S. Fish and Wildlife Service has discovered answers yet.

Migration is always hazardous to the cranes. They must survive the harsh buffeting of northern weather as well as the risk of meeting some curious marksman determined to take a closer look at the strange soaring birds.

Along the flyways of Saskatchewan and Alberta the cranes are always a welcome sight. Although each spring prairie fields, sloughs and marshes attract numerous migrant ducks, geese and sandhill cranes the rare whooper has a special place of honor. Once across the settled prairies the flocks have less than five hundred miles to fly before reaching the sanctuary of Wood Buffalo National Park.

Mammalogist William Fuller, Canadian Wildlife Service officer stationed at Fort Smith, will keep the nesting grounds under periodic observation when on regular game patrols. A new safeguard this year is the ban on low flying aircraft in effect from April 1st to October 15th. Planes travelling over this section of Wood Buffalo may not fly below 2,000 feet.

What conservationists in Canada and the United States are waiting to know is how many young will hatch in 1956. And how many will survive the dangerous life of the adult whooping crane.

Time is the most precious ingredient of all in education. The average student has only a few pennies of time to spend on education, and he can't buy everything in the store. It is up to his elders to help him spend his time as wisely as possible—to purchase not only a lot of little educational trinkets, but something that will sustain him all his life. In discussing the big question of what our schools should accomplish, let us never forget the preciousness of the student's time. As long as we remain fully appreciative of that, I believe we will find ourselves thinking in terms of educational priorities, rather than in terms of omnibus lists, of excellence rather than coverage.

Canadians statistics show that cancer is the second cause of death in children between the ages of 5 and 14 — surpassed only by accidental death.

Over 400 children under the age of 15 died of cancer in Canada last year.

Be your own "Private Eye" Watch for the seven danger signals that may mean cancer.

Cancer of the lung is 9 times as prevalent in men as in women.

On the average almost 55 Canadians die of cancer each day. More than 2 each hour.

Cancer is the commonest cause of death between the ages of 25 and 54 Canadians statistics show.

2,334 Canadians died of cancer of the intestines in 1954.

Fight cancer support the April Cancer Campaign.

Cancer is not contagious. It can appear at any age, but is most common with older people.

Cancer of the mouth is four times as common in men as it is in women.

Recent studies of the Canadian Indians sponsored by the Canadian Cancer Society shows that Indians have less skin cancer than do whites. One explanation of this may be that the pigment in the skin is a protection against the sun's rays. Past studies with American negroes show that they too have much less skin cancer than do whites.

More than 13,000 patients in Canada received welfare services from the Canadian Cancer Society in 1953 at a cost of \$350,000.

Cancer is an expensive disease. Contributions to the April Cancer Campaign help cancer patients meet this heavy expense.

Last year volunteers of the Canadian Cancer Society made and distributed free 4 million cancer dressings.

Cancer is an expensive disease. Contributions to the April Cancer Campaign help cancer patients to meet this heavy cost.

Cancer is the disorganized, unregulated growth of body cells. Although a great deal has been discovered about the nature of this growth the cause is still unknown.

Seed Treatments - What To Use.

Use good sound seed, free of weed seeds and dirt. Registered or certified seed is preferable.

Types Of Seed Treatment Available

1. General purpose seed disinfectants and protectants containing mercury to control both seed borne and soil borne diseases.

2. Non-mercurial chemicals such as Hexachlorobenzene (HCB) for the control of bunt of wheat.

3. Dual purpose treatments containing aldrin, heptachlor or lindane for wireworm control and mercury for disease control.

There are now available at least 31 registered seed treatment products of the above types; some are powders and some are liquids.

When To Treat

Wheat, rye and flax should be treated at least 24 hours before sowing. Oats and barley should be treated a week before sowing. Shorter periods of treatment do not allow the chemicals to disinfect the seed.

How To Treat

1. Commercial seed treating plants.
2. Farm-sized powder and liquid treaters—some of these can be attached to auger grain loaders, in which case the auger loaders should be run at half capacity to ensure adequate mixing.
3. Mixing by shovelling is undesirable — but if necessary, must be thorough to provide satisfactory coverage of all seed.

What To Treat

All wheat, rye, oats, barley and flax should be treated. The only exception being wheat that is known to be free of injury and disease and is to be planted in disease and wireworm free soil.

Mrs. Sybil Wallace fell and broke her hip as she stepped into the home of her mother, Mrs. T. B. Wood of Bryan, Texas.

Mrs. Wood and her other daughter, Mrs. Clara Wallace, took Mrs. Sybil Wallace to the hospital. At the entrance there, Mrs. Wood fell and sprained an ankle and Mrs. Clara Wallace fell and broke her wrist.

The famous Meter-Miser or "cold maker" in a frigidaire refrigerator or other Frigidaire refrigerating appliance, is one of the simplest pieces of mechanism known and consists of only three moving parts. It is encased in steel and oiled for life.

Dr. Don L. Earl and Brandt Curtiss Conductor and Ass't. Conductor respectively, of the Brigham Young University Chorus, were guests at the home of the Fanny Walker home.

At General Motor's Technical Centre is a wind tunnel for full sized automobiles and medium sized trucks. It is designed to generate an airstream ranging from 20 to 100 miles an hour—from a strong wind blast to a hurricane force.

More and more people are applying for treatment of cancer in its early stages than ever before. This is reflected in a decline in the death rate for cancer in certain sites. The death rate from cancer of the buccal cavity for instance has dropped 45% for males and 17% for women in the past 20 years. Last year over 2 million pamphlets explaining the nature of cancer and the importance of early diagnosis were distributed by the Canadian Cancer Society.

New cars have increased use of aluminum castings, particularly in the transmission section, according to GM engineers. These castings are produced by the semi-permanent mold and die casting process. Particular emphasis is placed on increased use of aluminum die castings in various applications which in some instances, replace cast iron. The trend towards decreased weight in cars reflects a continuing improvement in the future of the aluminum foundry.

A minister, lecturing to his Sunday school class on the necessity for keeping the body just as clean as the mind held up a bar of soap to emphasize his point. "Oh, oh!" whispered one disillusioned young student. "Here comes the commercial!"

Spring Planting: We know of a suburban gardener who after reading of farm surpluses has planned to reduce his four rows of vegetables to five feet in length instead of ten.
